

## DESIGN PROJECT SITE UPDATE

Last Updated: Friday, January 23, 2009

### **Project Name: Mason Street Bridge Over Mission Creek Replacement Project**

#### **Contact Information:**

City Project Manager: Jim Colton  
Phone: (805) 564-5514  
E-mail: [JColton@SantaBarbaraCA.gov](mailto:JColton@SantaBarbaraCA.gov)

Estimated start of construction: Spring 2012  
Duration of construction: 14 months

#### **Project Description:**

The bridge is located on Mason Street between Kimberly Ave and Chapala Streets. The project will involve replacement of the existing bridge with a new structure to improve hydraulic conveyance of Mission Creek as discussed in the Army Corps of Engineers, Lower Mission Creek EIR/EIS. A letter was received by the Department of the Army confirming that funding for design of an adjacent downstream portion of Lower Mission creek was authorized, thereby widening the channel in anticipation of bridge replacements/widenings.

#### **Project Progress:**

Caltrans has reviewed the City's request for funding of this bridge subject to authorized funding of the downstream widening by the Army Corps project. Therefore, funding has been approved by Caltrans and earmarked in the HBP Project Summary Report. Design authorization is also subject to FTIP Post Programming Changes slated for the spring of 2009. An RFP for design will be drafted in anticipation of design phase funding approval. If approved, design is schedule to begin the winter of 2009/2010. Pending design, right of way, and construction funding authorizations, this project is scheduled to go out to construction in the spring of 2012.
